

### 0.0.1 Last

The operation *last* will return the last element of a

- String Scalar
- Array Scalar
- Collection

such that

$$last(arg) = arg_j$$

and when *arg* is a Array Scalar or Collection

$$last(X) \Rightarrow last(< x_i..x_n..x_j >) = x_j$$

and when *arg* is a String Scalar

$$last(abc) \Rightarrow last(< a, b, c >) = c$$
